EXPERIENCE

Web Design | Freelance | Seattle, WA 2016 - 2021

- Provide website services and tech support remotely and in-person for local businesses ensuring all issues were resolved in a timely matter
- Implement content management systems, front end frameworks, plugins for small businesses to improve traffic and accessibility to their websites
- Launch new client websites by supervising hosting, acquiring domains, & troubleshooting
- Supervised hosting, acquired domains, and troubleshoot issues for new client websites, ensuring all customer needs were accounted for

Web Design & Frontend Development | Javelin Shelving | Seattle, WA 2018 - 2021

- Streamlined and modernized existing site by restructuring into a one-page layout
- Utilized CSS3 and HTML5 to reconstruct existing websites creating a more streamlined and modernized product
- Organized content with clear calls to action, enhancing user experience and business outcomes
- Edited images in Photoshop and Illustrator, creating a clear visual theme
- Improved accessibility with CSS3 media queries for mobile responsiveness

Web Design & Frontend Development | LucaLight | Seattle, WA 2017 - 2018

- Developed custom WordPress theme for an existing site for the site owner to have more customizability over their website
- Implemented plugins and photo gallery using HTML, CSS, JavaScript for the site owners to add their own photos, calendars, and other information
- Improved accessibility with CSS3 media queries for mobile responsiveness

Web Design & Frontend Development | Seattle Hiroshima Club | Seattle, WA 2016 - 2017

- Customized PHP templates with HTML5, CSS3, and Bootstrap for ease of use in a WordPress theme
- Increased revenue by implementing WordPress plugin for donations and membership dues
- Strengthened community by deploying WordPress database for member accounts and private content
- Improved accessibility with media queries for mobile responsiveness

PROJECTS

Twitter API Search Website 2018

- Used a minified Twitter API to pull the latest 200 tweets from a specific user
- Parsed data with JavaScript to improve readability, and integrated avatars.io to display the user's avatar

Seattle Eyewear Website 2015

- Researched user needs and clarified website objectives to define explicit goals
- Documented clear specifications for branding, design, content, and site features
- Designed wireframes and visuals in Illustrator and Photoshop
- Developed a protosite with HTML5, CSS3, and Bootstrap
